

Brighter Beginnings CDC

MARCH

What We are Learning!

The Baby Bees are scooting and crawling all around! Several have gotten new teeth and don't mind smiling so you can see them!

The Caterpillars and Butterflies are learning about Dinosaurs, Shapes, Spring Time and Bugs!

The Red Robins are continuing their unit on How things Grow, and will start new units on the Weather and Clothing.

Center Updates

We have been making some changes for our building lately! We have divided our BLUE room to make it two rooms, we will have Young Ones on one side and Twos on the other side. We had no idea that we would receive so many One Year Olds so we have had to get VERY creative in our room arrangements but hopefully this will help us out some! Thanks for your patience through all of our changes, we just want BBCDC to be perfect for your little ones! 😊

Important Info!

Now that the weather is warming up, please send weather appropriate change of clothes, but also keep Winter clothing here since we never know what season we will have each day! We will also start requesting sun screen and bug spray within the next few weeks.

Reminders

Children must arrive by 8:30 a.m. in order to eat breakfast and our arrival cut off time is 9 a.m. If you are running late or will be absent, please send us a message via Brightwheel.
